# Rada Shower Fittings Range

+

# Rada Shower Fittings Range

## Key features

### Single mode spray plate

The single non-adjustable spray plate removes the need for a complex adjusting mechanism required in a multi-mode handset.

Bacteria can thrive on the warm, wet surfaces of showerheads particularly in multi-function spray plates. Single mode spray plates have a fixed spray with no moving parts, meaning water can't become trapped which significantly reduces the risk of water stagnation, bacterial growth and the spread of infection.

### Detachable spray plate

Cleaning and disinfection is an important part of an effective infection control regime. The detachable spray plate facilitates a quarterly cleaning and descaling regime.

### Nozzle mat

Made from high quality silicone, the nozzle mat is easily detachable for cleaning, descaling and disinfection – helping to prevent the build-up of limescale and bacteria. Replacement nozzle mats are available.

### Clamp bracket

The smooth bracket design can be operated with one hand either by pulling or pushing the lever. This allows for easy height adjustment; an important design feature for those people that may not have the full use of both hands.

### Right angled connector (RAC)

The RAC is specified with an internal brass pipe to help reduce the risk of microbial growth, which replaces the plastic pipe found in many alternative designs.

### Hose

Metal hoses provide multiple crevices for dirt and bacteria to accumulate. The Rada hose provides a consistently smooth surface, which is very easy to clean. Silicone washers are also supplied to help reduce the risk of microbial growth.

Any moist or aqueous environment within a facility has the potential to serve as an incubator for waterborne microorganisms, which can result in acute contamination, infection and subsequent cross-infection.

The financial and resource demands this can place on a facility are significant. Yet it is the more pressing human cost and the emotional strain on those infected and their families that are incalculable.

To reduce the risk from waterborne infections, water systems must be managed in line with global health guidelines. This extends to every aspect of the system including showers and fittings.

Our new range of shower fittings has been designed with these guidelines in mind. The result is a more hygienic and healthier shower system which is compliant with global health guidelines and WRAS approved.

## 20-30%

of HCAs considered preventable

Rada SF1 10 BIV  
Part no: 72960-CP  
1.25m hose /  
675mm slide rail

Rada SH1 UK  
Part no: 72966-CP  
Fixed shower head

## The range

### SHOWER KITS FOR BUILT-IN VALVES

#### Rada SF1 10 BIV - Part no: 72960-CP

- Single mode removable spray plate
- 1.25m hose / 675mm slide rail
- RAC with internal brass pipe
- 8 litres / min flow regulator supplied

#### Rada SF1 20 BIV - Part no: 72961-CP

- Single mode removable spray plate
- 1.50m hose / 1000mm slide rail
- RAC with internal brass pipe
- 8 litres / min flow regulator supplied

### SHOWER KITS FOR SURFACE MOUNTED VALVES

#### Rada SF1 10 EV - Part no: 72964-CP

- Single mode removable spray plate
- 1.25m hose / 675mm slide rail
- 8 litres / min flow regulator supplied

#### Rada SF1 20 EV - Part no: 72965-CP

- Single mode removable spray plate
- 1.50m hose / 1000mm slide rail
- 8 litres / min flow regulator supplied

### FIXED SHOWER HEAD

#### Rada SH1 UK - Part no: 72966-CP

- Single mode removable spray plate
- Adjustable head angle
- 8 litres / min flow regulator supplied

Rada SF1 20 EV  
Part no: 72965-CP  
1.50m hose /  
1000mm slide rail

# Accessories

Global health guidelines recommend quarterly cleaning and descaling, which the new range has been designed to facilitate. However, for those facilities wishing to replace the handsets and hoses, we've introduced an additional range of independent accessories.

## Rada SF1 50 – 1.25m hose

- Smooth and easy to clean
- Silicone hose washers
- Ideal for facilities undertaking hose replacement programmes
- WRAS approved

*Part no: 76125-NA*

## Rada SF1 55 – 1.50m hose

- Smooth and easy to clean
- Silicone hose washers
- Ideal for facilities undertaking hose replacement programmes
- WRAS approved

*Part no: 76126-NA*

## Rada SF1 40 – 1.25m cat 5 hose and hose ring

- Designed for use with our surface-mounted shower valves
- Provides Category 5 backflow protection
- WRAS approved

*Part no: 19027-NA*

## Rada SF1 65 – silicone indicator rings

To assist facilities employing a quarterly cleaning regime, we've introduced a set of 4 coloured rings, which can be fitted between the hose and handset. They offer a clear visual recognition of the cleaning status of the handset / hose i.e. a different colour would represent each quarter of the year.

- Contains 50 sets of four coloured silicone rings

*Part no: 78156-NA*

## Rada SF1 60 – handset single mode

- Single mode handset with removable spray plate
- Removable silicone nozzle mat
- Supplied with four coloured indicator rings for quarterly cleaning and sterilisation regimes
- WRAS approved

*Part no: 77322-CP*

## Rada SF1 70 – fixed head assembly only (SH1)

- Single mode with removable sprayplate
- Adjustable head angle
- 8 litres / min flow regulator supplied

*Part no: 24842-CP*

## The Rada way

Since the 1930s, Rada has been driven to design water flow controls and washroom products that promote safety and sustainability and to solve problems in a way that makes a fundamental difference to people's lives.

We believe people should be safe and secure, using taps and showers designed to prevent injury and waterborne infection while conserving resources. It's at the heart of everything we do.

## Rada – A Kohler Company

Kohler brings together a number of market leading bathroom and shower brands including Rada, Kohler UK and Mira Showers. If you'd like to know more please visit [www.kohlermira.co.uk](http://www.kohlermira.co.uk)
